

Compliance Support Services

Our primary focus is to build strong, long-term client partnerships and provide tailored solutions to address regulatory compliance requirements.

Tellevate's compliance support services help our clients to improve environmental, health, and safety (EHS) compliance performance and implement innovative strategies and tools to simplify compliance program management.

Tellevate's compliance support services include:

- Compliance program development, including identifying key compliance program areas, identifying applicable regulatory requirements, and evaluating existing program elements
- Developing compliance policies, plans, and procedures based on regulatory requirements and organizational needs (e.g., SPCC plans, waste management plans, OSHA written programs, etc.)
- Compliance assistance with federal, state, permit, and local EHS requirements
- Regulatory analysis, including applicability evaluations and requirements inventory development
- Air quality compliance consulting and permitting support
- Regulatory negotiation and litigation support, including work with attorneys, regulators, and other stakeholders regarding regulatory liabilities and enforcement actions
- Technical assistance to address audit and inspection findings and corrective actions
- Compliance program training

Our highly qualified consultants leverage years of industry, government, and consulting experience with an in-depth knowledge of:

- Federal, state, permit, and local environmental compliance requirements
- ISO 14001 and OHSAS 18001/ ISO 45001 management systems
- Information management tools
- Extensive experience conducting multi-media and management system audits

Tellevate's consultants maintain professional registrations and certifications and have extensive on-the-job experience. We have experience working in industry, consulting, and as regulators in compliance assistance, auditing, and permitting.
