

EHS Training Services

Tellevate provides customized Environmental, Health, and Safety (EHS) training to ensure your organization is prepared to implement EHS programs and comply with applicable requirements.

Tellevate has specialized consultants and proven training strategies to fit our clients' diverse needs. We provide training in a customized yet cost-effective manner.

Effective EHS training is an important tool to help improve performance and ensure compliance. Tellevate's innovative EHS training offerings are tailored for our clients and will help you to:

- Simplify and clarify complex and constantly-evolving regulations
- Reduce organizational costs by allowing personnel to receive relevant, EHS training onsite
- Focus on your organization's processes and specific permit, plan, and regulatory requirements
- Utilize webinar training to supplement onsite training, accommodate remote locations, and provide refresher trainings

Tellevate's consultants are skilled trainers with the following minimum qualifications:

- Extensive experience providing multi-media compliance training to federal and state government, industry, commercial, municipal, and utility clients
- International regulatory expertise and multilingual consultants fluent in several languages to service clients throughout the world
- Bachelor's degree and no less than five years of training experience. Senior consultants have no less than ten years of training experience
- Up-to-date subject-matter and technical training including the requirements of the ISO 14001/OHSAS 18001/ISO 45001 standards and BEAC Management Systems Auditor Certification
- Experience working as regulators in permitting and compliance assistance

Tellevate's EHS training offerings can be customized to include:

- Specific content relevant to your operations, activities, and environmental compliance requirements
- Multi-media environmental compliance programs
- Health and safety regulations
- EHS Management Systems and ISO Standards
- Auditing principals and audit program development
- Auditing software tools and information management systems
- Sustainability programs and Executive Order requirements
- Onsite or webinar sessions
- Train-the-trainer sessions with course content, speaker notes, and training guidebooks
