

Tellevate Risk Management Program

Tellevate provides a tailored Risk Management Program to ensure your organization effectively manages identified risks and environmental compliance requirements.

Many industries are required to develop a Risk Management Program based on 40 Code of Federal Regulations (CFR) Part 68. An effective Risk Management Program will help your organization meet its environmental goals, minimize risks, and maintain compliance with 40 CFR 68 and other related requirements.

Tellevate's consultants have experience auditing and implementing Risk Management Programs across a wide range of operations. Our implementation approach includes:

- Conducting a risk management assessment to review identified risk and recommend areas for improvement
- Creating a detailed implementation plan to guide organizations through the Risk Management Program development process
- Structuring the Risk Management Program to address the elements required by 40 CFR 68 and integrating the program into existing 29 CFR 1910 Process Safety Management Systems
- Developing customized procedures to address the elements of the Risk Management Program and integrating those elements into the organization's Environmental Management System (EMS) to create continuity between programs
- Incorporating a hazard review inventory and implementing corrective action planning and documentation tools to address hazards identified
- Customizing on-site training for personnel on the elements and tools included in the Risk Management Program

Tellevate's consultants utilize information solutions to develop a tailored Risk Management Program that includes:

- Conducting a detailed IT assessment to incorporate existing IT tools and provide recommendations for improvement
- Utilizing Microsoft® SharePoint® to develop and implement the Risk Management Program by integrating the program elements, procedures, documents, records, and other data management tools
- Creating compliance calendar events to allow for tracking of regulatory deadlines, corrective action timelines, and other key compliance dates

Tellevate's Risk Management Programs are structured to include the following elements:

- Applicability
- Hazard Assessment
- Safety Information
- Hazard Review
- Standard Operating Procedures
- Training
- Maintenance
- Compliance Audit
- Incident Investigation
- Emergency Response
- Risk Management Plan
- Record Retention
- Management
